Source: Field Data, 2011

Markets constitute a source of income to the municipal council through market tolls and rents for constructed sheds. The Municipality has a spread of markets in all four constituent villages.

The Bamunka market is the main market in the municipality. It is well constructed with permanent sheds but the food market is disorganised with no permanent structures. In Bamali, there are three markets namely: Mboone, Yiit and Neghow. Mboone is the main market. None of these three markets have permanent sheds but are made up of temporal and semi – permanent sheds most of which are in an abandoned and dilapidating state.

In Nsei (Bamessing) the main market is the Weingan market with 36 permanent sheds, 12 sheds under construction and 120 makeshift sheds constructed with local materials (bamboos and sticks). Goods sold in these markets including; various food items (plantains, Bananas, cassava, coco-yams, beans, groundnuts, potatoes, rice etc.), fruits, semi processed food items (*garri*, *waterfufu*, flour, palm oil) meat and fish, processed food items, school items, dress items, cosmetics, medicines, household utensils, household electronic items, etc. Hawkers are a common characteristic.
